

Ovens and MiniGrill

■ Ovens and MiniGrill

Designed to complete the Smev product offer, the ovens are up to the standard one would expect from a domestic oven. The uniform heat distribution inside the oven, together with low gas consumption, is the result of careful research based on the idea of considering them just like normal home ovens.

■ Forni e Vano Grill

Progettati per completare la produzione Smev, i forni offrono lo standard tipico del forno di casa propria. Lo studio della distribuzione del calore all'interno del vano forno è frutto di un attento studio che ci ha portato con bassi consumi a considerarlo davvero il forno di casa nostra.

■ Fours et Mini-grill

Conçus pour compléter la production Smev, les fours offrent une qualité comparable à celle-ci d'un four domestique. Une recherche approfondie est à la base de l'étude de la distribution de la chaleur à l'intérieur de l'espace four. Elle nous a permis d'obtenir, avec de faibles consommations, un four comparable à celui que l'on peut avoir chez soi.

■ Backöfen und Grillraum

Sie vervollständigen das Herstellungsprogramm des Unternehmens Smev und entsprechen dem Standard der im Haushalt üblichen Backöfen. Die Hitzeverteilung im Inneren des Backofens ist das Ergebnis intensiver Studien, so daß ein geringer Verbrauch und optimale Leistung, gleich unserem Backofen zu Hause, möglich werden.
