Important note pertaining to heater installations on marine craft

Government regulations that may vary in different regions may exist concerning the mode, installation and design of heaters designed for installation on boats.

Compliance with such regulations is checked and verified by various authorities. Please familiarise yourself with which regulations may apply in the region where you wish to operate your vessel so that you can take these regulations into account when selecting the heater and planning its installation. For the installation and/or routing of fuel lines inside engine compartments, only components meeting the requirements of EN ISO 7840 may be used.

Please also note that when installing into the engine compartment of the vessel, all respective fuel supply components must be fireproof, according to EN ISO 7840.

Marine Air Conditioners

The right climate is essential!

BlueCool Classic

BlueCool Premium

Webasto now offers a full comprehensive range of Marine Air Conditioning System within it's product portfolio.

Due to the diverse nature of installations, pricing for suitable systems are available upon request.

The **Blue Cool Classic** self-contained air conditioning systems provide the perfect answer for boats with one to three cabins.

Ideal for retro-fitment, the range comprises eight models with cooling capacities from 1.5kW to 8.8kW.

Each model is simple to install, automatic in operation, contains an environmentally friendly refrigerant and dehumidifies as it cools. All construction is from salt water-resistant materials, so low maintenance is an additional bonus.

Larger yachts and power cruisers will require the **Blue Cool Premium** chiller/water range.

These comprise a central cooling unit that cools water, which is then distributed via a pipe network to a fan-type heat exchanger in each cabin. Electronic climate controllers enable the luxury of being able to select individual temperatures throughout the vessel.

The twelve-model range includes systems capable of cooling outputs from 3.5kW to 14.6kW, plus the convenience of reverse cycle heating if required.

Larger units with capacities up to 150kW are available on request.

2 Application of Terms

- 2.1 Subject to any variation under Condition 2.2 the Contract will be subject to these Conditions to the exclusion of all other terms and Conditions (including any terms or Conditions which the Customer purports to apply under any purchase order, confirmation of order, specification or other document whatsoever).
- 2.2 Any variation to these Conditions and any representations about the Goods or Services shall have no effect unless expressly agreed in writing and signed by a director of the Company.
- 2.3 Each order for Goods or Services by the Customer from the Company shall be deemed to be an offer by the Customer to purchase Goods or Services subject to these Conditions.
- 2.4 No order placed by the Customer shall be deemed to be accepted by the Company until a written acknowledgement of order is issued by the Company or (if earlier) the Company commences manufacture or despatch of the Goods to the Customer. Any order shall be accepted entirely at the discretion of the Company.
- 2.5 The Customer must ensure that the terms of its order and any applicable specification are complete and accurate.

- 4.3 Any dates specified by the Company for delivery of the Goods are intended to be an estimate and time for delivery shall not be made of the essence by notice. If no dates are so specified, delivery will be within a reasonable time.
- 4.4 Subject to the other provisions of these Conditions the Company will not be liable for any loss (including loss of profit), costs, damages, charges or expenses caused directly or indirectly by any delay in the delivery of the Goods (even if caused by the Company's negligence), nor will any delay entitle the Customer to terminate or rescind the Contract unless such delay exceeds 90 days.
- 4.5 If for any reason the Customer does not accept delivery of any of the Goods when they are ready for delivery, or the Company is unable to deliver the Goods on time because the Customer has not provided appropriate instructions, documents, licences or authorisations then the Goods will be deemed to have been delivered, risk passing to the Customer (including for loss or damage caused by the Company's negligence) and the Company may:

- 4.8 The Customer will provide at its expense at the place of delivery adequate and appropriate equipment and manual labour for loading the Goods.
- 4.9 If the Company delivers to the Customer a quantity of Goods of up to 10% more or less than the quantity accepted by the Company the Customer shall not be entitled to object to or reject the Goods or any of them by reason of the surplus or shortfall and shall pay for such goods at the pro rata Contract rate
- 4.10 The Company shall be entitled at its discretion to make delivery of the Goods by instalments and to invoice the Customer for each Instalment despatched. Where the Goods are to be delivered in instalments, each delivery shall constitute a separate contract and failure by the Company to deliver any one or more of the instalments in accordance with these Conditions or any claim by the Customer in respect of anyone or more instalments shall not entitle the Customer to treat the Contract as a whole as repudiated or to refuse to accept subsequent instalments.
- 4.11 The quantity of any consignment of Goods as recorded by the Company upon despatch from the Company's place of business shall be conclusive evidence of the quantity received by the Customer on delivery unless the Customer can provide conclusive evidence proving the contrary.

- 4.25 Without limiting the generality of any of the other Contract Terms the Company will not be under any liability to the Customer if at the time of any call off by the Customer the Company is unable for whatever reason to supply goods in accordance with the Customers requirements.
